This book is the fourth official archival publication devoted to RoboCup and documents the achievements presented at the Fourth Robot World Cup Soccer Games and Conferences, RoboCup 2000, held in Melbourne, Australia, in August/September 2000. The book presents the following parts: introductory overview and survey, championship papers by the winners of the competitions, finalist papers for the RoboCup challenge awards, papers and posters presented at the workshop, team description of a large number of participating teams. This book is mandatory reading for the rapidly growing RoboCup community as well as a valuable source of reference and inspiration for R & D professionals interested in multi-agent systems, distributed artificial intelligence, and intelligent robotics.

This book constitutes the proceedings of the 9th IFIP WG 8.5 International Conference on Electronic Participation, ePart 2017, held in St. Petersburg, Russia, in September 2017. The 11 revised full papers presented in this book were carefully reviewed and selected from 14 submissions. The papers reflect completed multi-disciplinary research ranging from policy analysis and conceptual modeling to programming and visualization of simulation models. They are organized in four topical threads: methodological issues in e-participation; e-participation implementations; policy modeling and policy informatics; critical reflections.

A comprehensive textbook on data analysis for business, applied economics and public policy that uses case studies with real-world data.

This comprehensive text explores the philosophy that all nurses are leaders who use creative decision making, entrepreneurship, and life-long learning to create a work environment that is efficient, cost-effective, and committed to quality care. Broad and comprehensive coverage encompasses leadership and management theories and processes by synthesizing information from nursing, health care, general administration and management, and leadership literature. Activities teach them how to research decision-making data (participatory action research process) and analyze and make reliable choices in managing their work environment. Theory-based, scholarly yet practical, this is the most comprehensive and engaging baccalaureate text on the market.
