You'll walk through the entire sales process from start to finish, learning critical hacks every step of the way. Find and capture your lowest-hanging fruit at the top of the funnel, build massive lead lists using ICP and TAM, utilize multiple prospecting strategies, perfect your follow-ups, nurture leads, outsource where advantageous, and much more. Build, refine, and enhance your pipeline over time, close deals faster, and use the right tools for the job—this book is your roadmap to fast and efficient revenue growth. Without a reliable process, you're disjointed, disorganized, and ultimately, underperforming. Hacking Sales shows you how to get ahead of everyone else with focused effort and the most effective approach to modern sales.

The definitive playbook by the pioneers of Growth Hacking, one of the hottest business methodologies in Silicon Valley and beyond. It seems hard to believe today, but there was a time when Airbnb was the best-kept secret of travel hackers and couch surfers, Pinterest was a niche web site frequented only by bakers and crafters, LinkedIn was an exclusive network for C-suite executives and top-level recruiters, Facebook was MySpace's sorry step-brother, and Uber was a scrappy upstart that didn't stand a chance against the Goliath that was New York City Yellow Cabs. So how did these companies grow from these humble beginnings into the powerhouses they are today? Contrary to popular belief, they didn't explode to massive worldwide popularity simply by building a great product then crossing their fingers and hoping it would catch on. There was a studied, carefully implemented methodology behind these companies' extraordinary rise. That methodology is called Growth Hacking, and it's practitioners include not just today's hottest start-ups, but also companies like IBM, Walmart, and Microsoft as well as the millions of entrepreneurs, marketers, managers and executives who make up the community of Growth Hackers. Think of the Growth Hacking methodology as doing for market-share growth what Lean Start-Up did for product development, and Scrum did for productivity. It involves cross-functional teams and rapid-tempo testing and iteration that focuses customers: attaining them, retaining them, engaging them, and motivating them to come back and buy more. An accessible and practical toolkit that teams and companies in all industries can use to increase their customer base and market share, this book walks readers through the process of creating and executing their own custom-made growth hacking strategy. It is a must read for any marketer, entrepreneur, innovator or manager looking to replace wasteful big bets and "spaghetti-on-the-wall" approaches with more consistent, replicable, cost-effective, and data-driven results.

Named by Inc. magazine as one of the 10 Best Business Books of 2018 Every startup wants to change the world. But the ones that truly make an impact know something the others don't: how to make government and regulation work for them. As startups use technology to shape the way we live, work, and learn, they're taking on challenges in sectors like healthcare, infrastructure, and education, where failure is far more consequential than a humorous chat with Siri or the wrong package on your doorstep. These startups inevitably have to face governments responsible for protecting citizens through regulation. Love it or hate it, we're entering the next era of the digital revolution: the Regulatory Era. The big winners in this era--in terms of both impact and financial return--will need skills they won't teach you in business school or most startup incubators: how to scale a business in an industry deeply intertwined with government. Here, for the first time, is the playbook on how to win the regulatory era. "Regulatory hacking" doesn't mean "cutting through red tape"; it's really about finding a creative, strategic approach to navigating complex markets. Evan Burfield is the cofounder of 1776, a Washington, DC-based venture capital firm and incubator specializing in regulated industries. Burfield has coached startups on how to understand, adapt to, and influence government regulation. Now, in Regulatory Hacking, he draws on that expertise and real startup success stories to show you how to do the same. For instance, you'll learn how... * AirBnB rallied a grassroots movement to vote No on San Francisco's Prop F, which would have restricted its business in the city. * HopSkipDrive overcame safety concerns about its kids' ridesharing service by working with state government to build trust into its platform. * 23andMe survived the FDA's order to stop selling its genetic testing kits by building trusted relationships with scientists who could influence the federal regulatory community. Through fascinating case studies and interviews with startup founders, Burfield shows you how to build a compelling narrative for your startup, use it to build a grassroots movement to impact regulation, and develop influence to overcome entrenched relationships between incumbents and governments. These are just some of the tools in the book that you'll need to win the next frontier of innovation.

Master the evergreen traffic strategies to fill your website and funnels with your dream customers in this timeless book from the \$100M entrepreneur and co-founder of the software company ClickFunnels. The biggest problem that most entrepreneurs have isn't creating an amazing product or service; it's getting their future customers to discover that they even exist. Every year, tens of thousands of businesses start and fail because the entrepreneurs don't understand this one essential skill: the art and science of getting traffic (or people) to find you. And that is a tragedy. Traffic Secrets was written to help you get your message out to the world about your products and services. I strongly believe that entrepreneurs are the only people on earth who can actually change the world. It won't happen in government, and I don't think it will happen in schools. It'll happen because of entrepreneurs like you, who are crazy enough to build products and services that will actually change the world. It'll happen because we are crazy enough to risk everything to try and make that dream become a reality. To all the entrepreneurs who fail in their first year of business, what a tragedy it is when the one thing they risked everything for never fully gets to see the light of day. Waiting for people to come to you is not a strategy. Understanding exactly WHO your dream customer is, discovering where they're congregating, and throwing out the hooks that will grab their attention to pull them into your funnels (where you can tell them a story and make them an offer) is the strategy. That's the big secret. Traffic is just people. This book will help you find YOUR people, so you can focus on changing their world with the products and services that you sell.

A book to help companies find customers and create repeatable sales by developing effective inside sales organizations and development strategies.
