Teaching helps students, the teachers of tomorrow, explore the world of education. Besides investigating teaching as a profession, students will develop an understanding of the different types of learners they will encounter in the classroom. This includes how humans develop physically, intellectually, emotionally, and socially as all of these impact the instructional methods used. The educational system, both past and present, is reviewed along with the responsibilities that come with employment. Students receive a full introduction to the role and duties of a teacher, including planning, instructional methods, assessment, and classroom management. Expanded chapter reviews help students develop a variety of skills while new professionalism features emphasize appropriate workplace behavior. This is the only textbook available for high school students planning a teaching career.

The Teacher's Resource File supplements the core work covered in the Students'Book with extension and support work, thus giving the opportunity for further differentiation. Self-access answers to worksheet activities are provided in Ripponses sheets. The Vocabulaire 1 sheet provides, for all students, a reference for the key language of the Phrases-clis boxes on the spreads, presenting it in the context of whole sentences, with English translations. The Vocabulaire 2 sheet in the form of single vocabulary items gives more able students access to an extended range of language, again with an English translation. The File contains visuals (Presentation sheets) which can be printed onto OHP acetates. These are particularly useful for presenting and practising new items of vocabulary. Four separate Assessment tests are provided at intervals throughout the course, each one divided into the four National Curriculum Attainment Targets - Listening, Speaking, Reading, and Writing. A suggested allocation of marks for each test is given on the assessment sheet. Teacher's notes, tape transcripts and mark schemes are found in the Teacher's Book.
