Straight A's in Fluids and Electrolytes is an excellent review for the NCLEX® and for the fluids and electrolytes component of medical-surgical nursing courses from the LPN through the BSN level. It follows the unique, highly visual two-column Straight A's format—an in-depth outline review in the inner column and a quick-scanning key points refresher in the outer column. Other study aids include "Top 10" Lists that save students time before exams, Time-Out for Teaching tips on patient teaching, Go with the Flow algorithms, and dozens of illustrations. The book and bound-in CD-ROM contain hundreds of NCLEX®-style questions—including alternate-format questions—with answers and rationales.

Data interpretation questions based on clinical cases are a popular means of testing medical students both during undergraduate studies and as an element of finals examinations. Written by a small team of authors with extensive teaching experience, 100 Cases in Medical Data Interpretation provides invaluable guidance from lecturers who understand from personal experience that detailed and accurate explanations are the key to successful revision. This book presents 100 cases arranged by specialty area—radiology, clinical chemistry, haematology and cardiology—as well as a random section of miscellaneous cases. Questions accompanying each case prompt the reader to consider how the data presented might be correctly understood. A clear discussion of how the correct answer was reached, with boxed highlights and bullet lists of key points, makes this book an excellent learning aid during all stages of clinical studies, and particularly while preparing for medical finals.
